

# Kaltura CaptureSpace Lite

## Overview

Kaltura CaptureSpace Lite replaces the screen-recording feature in Moodle as a user-friendly tool that does not depend on Java or other plugins to run properly. It does require a download but does not require IT department assistance for installation. With CaptureSpace Lite users can

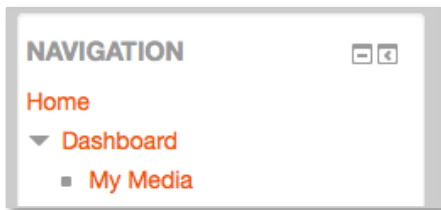

- 📹 Capture the Screen, Webcam, and Audio
- 📹 Capture the Screen and Audio
- 📹 Capture Webcam and Audio
- 📹 Capture Audio Only

The instructions in this document are for Windows computers, but the process is much the same for Macs.

## How to Install Kaltura CaptureSpace Lite

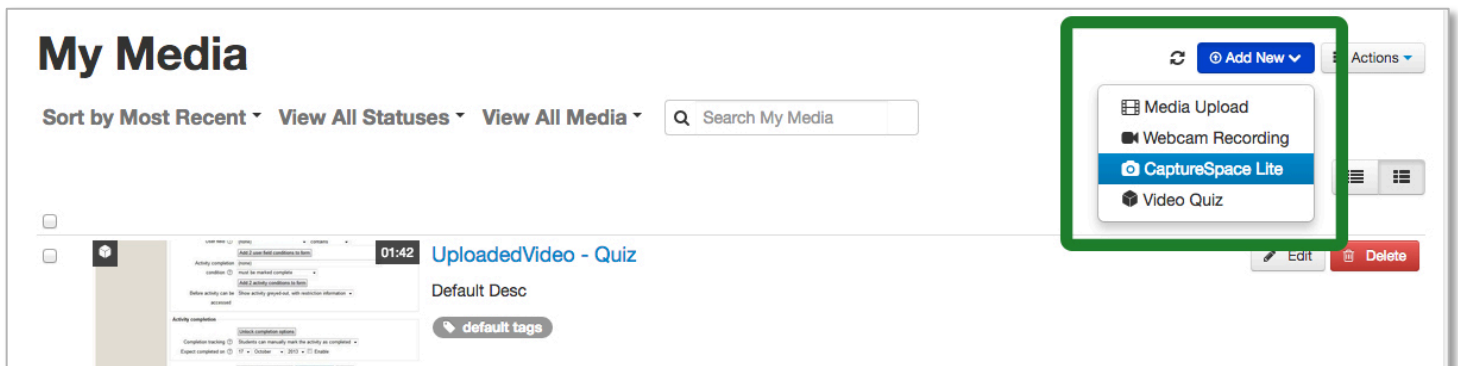

### Step 1

Open a Moodle course, locate the **Navigation block**, open the **Dashboard** and click on **My Media**.

### Step 2

Click the blue **Add New** button and choose **CaptureSpace Lite** from the menu.

## Step 3

The **Kaltura CaptureSpace Desktop Recorder** screen will open with download options. Choose the proper **Download** link for your computer.

**The Kaltura CaptureSpace Desktop Recorder**  
The Kaltura CaptureSpace Desktop Recorder enables easy capture in class, at home or on-the-go with automated publishing and interactive viewing within the LMS and Kaltura's MediaSpace video portal.

### Download for Windows

**Windows System Requirements**

- Windows 7,8,8.1 or 10 32/64 bit
- .NET Framework 4.0+
- Visual Studio runtime tools

**Supported Microsoft PowerPoint Versions**

- Microsoft PowerPoint 2007 32 bit
- Microsoft PowerPoint 2010 32/64 bit
- Microsoft PowerPoint 2013 32/64 bit

[Download for Windows](#)

### Download for Mac

**OS X System Requirements**

- OS X 10.8 and up

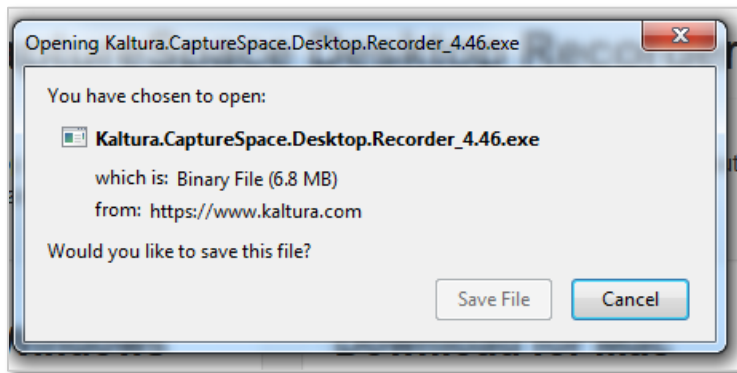

**Supported Microsoft PowerPoint Versions**

- Microsoft PowerPoint 2011
- Microsoft PowerPoint 2016

[Download for Mac](#)

## Step 4

Click **Save File** in the prompt that appears.

## Step 5

Locate the **Kaltura.CaptureSpace.Desktop.Recorder\_4.46.exe** file on your computer. (The number may be different in the filename.) Typically, it should be in your **Downloads** folder but may be on your desktop if you have set your browser to save files there (**My Computer>Downloads**).

Favorites	Name	Date modified	Type	Size
	Kaltura.CaptureSpace.Desktop.Recorder_...	3/23/2016 10:18 AM	Application	6,948 KB

## Step 6

**Double click the filename** to install the recorder. Be patient and click the filename only once. A shortcut icon will appear on your desktop when the installation is complete.

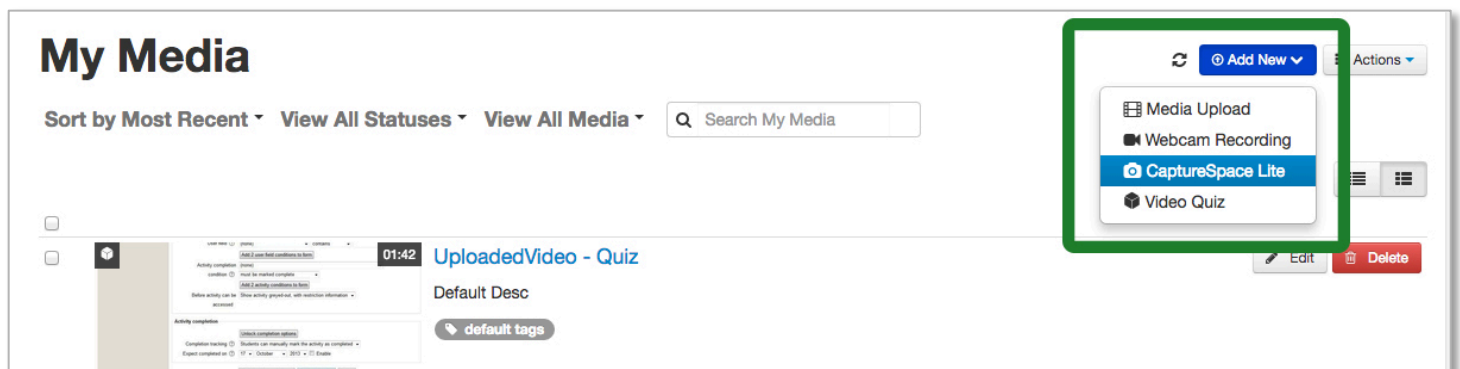

## Step 7

**Close** the Download window and **return to My Media** in Moodle in order to exit the download links screen.

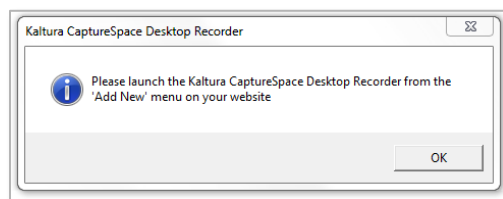

**NOTE** – If using Windows 10, Launch Desktop Icon. Proceed to Step 10 below.

## Step 8

To launch the recorder for the first time, go to **My Media**, click the blue **Add New** button and choose **CaptureSpace Life** from the menu.

 **Note:** If you click the Kaltura CaptureSpace Desktop Recorder icon from your desktop shortcut, you will see the following message. Click OK and launch the recorder by following the Step 8 instructions.

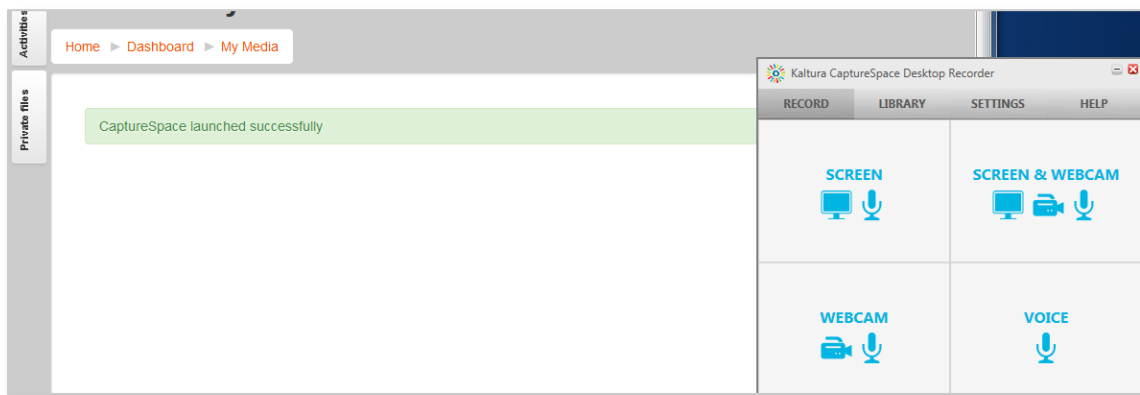

## Step 9

A **Launch Application** screen will open. You do not need to choose an application as the Kaltura CaptureSpace Desktop Recorder is already chosen. **BE SURE TO CHECKMARK Remember my choice of kaltura-lc links** and choose **OK**.

## Step 10

The Kaltura CaptureSpace Desktop Recorder console will appear on lower-right corner of your computer desktop. Media created can be located in My Media in Moodle.

## Additional Information

- After this one-time process is complete, a user can use the Kaltura CaptureSpace Desktop Recorder shortcut that appears on the computer desktop instead of going first to My Media.

- The process described in this document needs to be completed on each computer the user wishes to use for screen recording.
- This process will work ONLY on computers as the recorder is an application.
