

Hub Logon tips:

Southeast Community College's portal 'The Hub' is your gateway to all services of the College and links to your on-line classes. To access the Hub from school or home computer, enter **thehub.southeast.edu** in your browser or click on ... <https://thehub.southeast.edu>.

Your username and password: Your **username** is the **F**irst Initial + **L**ast initial + your college **ID number** without leading zeros. Molly Moodle's college ID number is 0123456 so her username would be **mm123456**. Your **password** is the one you created after doing a password reset. Access to The Hub is different at home compared to the College and both are illustrated below:

At Home

Your username and password are required to access 'the HUB'. Enter the following in your browser if attempting to logon at home **thehub.southeast.edu** or click on this link ... <https://thehub.southeast.edu>

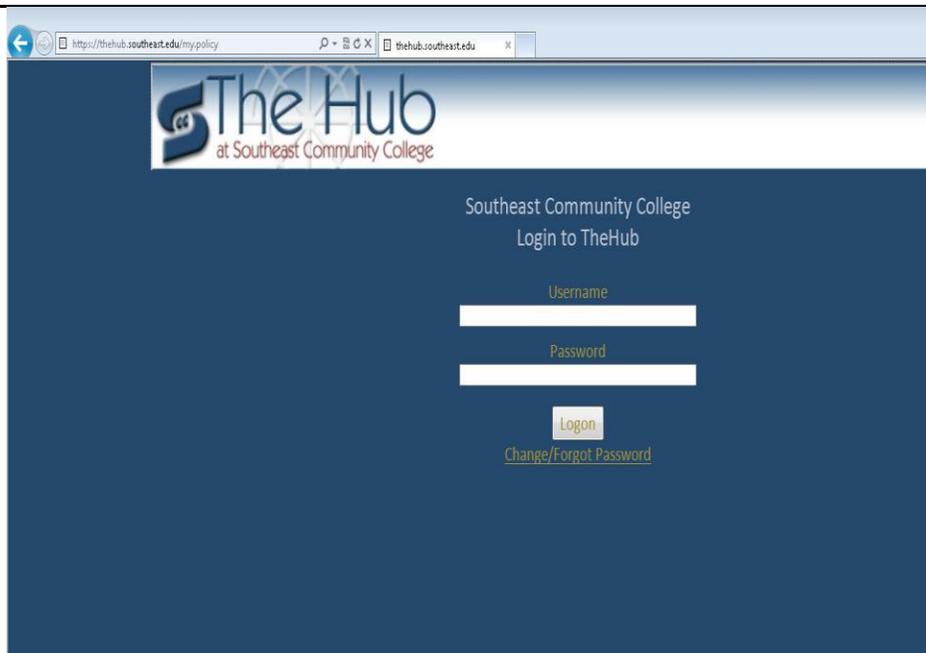

The screen below will appear for entry of your login credentials.

User name: (your SCC Username)

Password: (your SCC Password)

At College

The student or employee would (1) logon to the **SCC computer** using your WebAdvisor username and password, and (2) open Internet Explorer. The default page for IE will be set to <https://thehub.southeast.edu>. You should automatically be logged on to The Hub because of its single sign-on feature.

How do I log on to another domain?

Remember to **always** lock your computer when you temporarily leave your workstation. Locking your computer is even more important when you are on 'The Hub' since you are signed into all of your applications. If your computer is not locked, anyone at your computer has access to everything you have access to. To lock your computer, hold down the windows key and press the L key.

To unlock your computer, enter your password in the box provided on your screen.

Note: Remember to LOCK the computer whenever you temporarily leave your workstation!

(+ L).

Note: Remember to LOG OFF the computer at the end of class or Shutdown the computer if leaving for the day.
